Foreword
Mayor
Welcome to Tirana!

I am happy to welcome you in the European Youth Capital 2022. Tirana uses this year to focus especially on the youth – our future. We are organizing more than 1,000 activities throughout the year to celebrate, create, discuss and progress.

We all know that our youth is the greatest asset of our city and even our country. Tirana is a young city – Albania has one of the youngest populations in Europe. Through this energy, we are moving quickly towards a prosperous and sustainable future within the EU. Each one of you has the opportunity to change the world. This is our moment, our time, this is our year as a European Youth Capital.

Our program as the European Youth Capital 2022 is an ambitious one that focuses on the needs of young people of today and tomorrow, championing non-formal values and best practices. The whole program encourages positive activism by presenting eight interwind themes comprising dozens of projects and hundreds of wide-range activities. Its themes are: Youth makes creative economy & innovation; Youth creates culture, Youth develops capacity, Youth Participates; Youth is diversity; Youth are Europeans; Youth Eco-Health; Youth Spaces.

This Guide takes you on a journey around the city to discover all the great opportunities it offers to its youth. We show you our murals as well as co-working spaces. Have a look at the newly re-designed public spaces where children play and youngsters show-off their BMX skills.

Throughout the whole year, we collaborate with many actors. This guide is composed in collaboration with the Sustainable Urban Transport in Tirana Project of Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH. We are happy to work together towards a more livable and sustainable future.

Let’s re-discover life together!
Welcome to Tirana, Albania

A city so old that it dates back to the Paleolithic era and with 100 years of history as the capital of Albania, Tirana nowadays is known as the largest and most vivid city in Albania, with about half of its population under 35 years old. Due to its role as the center of political, economic and cultural life of Albania and as home to the most prestigious public and private universities in the country, Tirana is becoming one of the most dynamic and forward-looking cities in the region.

The fast-paced transformation of the city can be seen not only in its urban appearance but also in the growing opportunities and incentives for youth, who are now shaping the city’s economy, event scene, mobility trends, etc.
Other than sunny, warm weather, great hospitality and generosity, in our city you will find very friendly multilingual and curious citizens who will make you feel home and introduce you to our rich culture and traditions, great food and nightlife.

The number of youth-friendly spaces in the city has increased rapidly in the last years as well as the number of cultural and artistic events that promote youth talent, such as the Tirana Art Fest, yearly theatre and literature festivals, stand-up comedy shows, public speaking events and more. The young population has also been an important factor for the explosion of public and street art that can be found all over the city and that, in a way, have become an alternative but powerful voice of the younger generation. European Youth Capital Activ∞ Tirana 2022 is the fruit of close collaboration among the National Youth Congress, which represents a broad network of local youth groups, and the Municipality of Tirana, a cooperation that will continue during its implementation and in the years to come.

Aiming the spirit of YOUTH ACTIVISM towards important matters of daily life, the program has been designed to bring into focus 8 intertwined and inclusive themes:
Twelve flagship events will be organized throughout the year for each proposed theme, together with hundreds of activities that will take part during Tirana European Youth Capital 2022. The proposed activities are aimed at activating the youth of Tirana and the participating region into becoming more involved and proactive on issues that concern their generation, and especially help youngsters understand the true power of change that lies in their hands. Lastly, the carefully designed program aims to place the youth of Tirana at the center of the engine that will drive the sustainable development of the capital and the country in the near future.

Murals around Tirana

Walking Tour Length: 45 mins
Cycling Tour Length: 60–70 mins
This tour gives you the opportunity to look at the city of Tirana in a colorful and artistic way. In 2018, the urban Arts festival, “MurAl Fest”, took place in Tirana. Large-scale murals are set to be a new attraction in the Albanian capital. After the success of the first MurAl fest in 2018, this festival repeated with MurAl fest 2019, 2020 and 2021. Most of the murals from the first MurAl Fest of 2018 remain, while some have been painted over due to the recoloring of the building’s façade.

Youth Park is the central public park of the capital, built in 1949, covering an area of 29.81 ha. The park was built follow the plan of Italian architects Brasini and De Fausto, in addition to the complex of ministries, the Municipality of Tirana, the National Bank, the garden of this central complex, and the central square with the fountain.

Today Youth Park (Parku Rinia) has a variety of green spaces spread out a changing relief, serving not only as an acoustic wall, but also promoting physical activity for children. In addition to a special space dedicated to those who want to play with animals, mini-squares have been created for children to play and the elderly.

Youth Park's main landmark is a white, terraced building on its western edge, which houses cafés, restaurants, the Regency Casino (one of only a few legally operating in Tirana) and fountains. The park is often referred to by an nickname, Taivani (Taiwan), shared by the Taivani Bar & Grill as well as the entire commercial center (Taivani Center).
March 14 marks Summer Day, a pagan holiday celebrating the end of winter. Although the epicenter of this festival is in Shkumbin (Elbasan), the festival is widely celebrated in Tirana as well, as in the Youth Park, a circus show is put on the evenings and is packed with circus performers, acrobats, magicians and festival goers.

The Tirana Independence Monument, designed by Visar Obrija and Kai Roman Kiklas, is also found here. The monument has a doubled meaning: a sign of perpetual natality (the possibility of the “rebirth” of national consciousness) and as a ruin with a spectral pseudo-presence (as an object that continually reminds us of the disjuncture that divorces the present from its historicity).

It serves as a center for relaxation and education, especially in relation to problems facing Albanian flora and vegetation and nature in general, especially related to the identification of values and its preservation.

The Botanical Garden is also used to educate youth being part of the University of Tirana, and it serves schools throughout the country. A seed index is regularly published and the garden has relationships with around 160 botanical gardens worldwide.
Zoological Park

The zoo, the only public one in Albania, was built in 1960 to 1961. It has a total area of 6.09 ha, of which 1.3 ha is occupied by water and about 1 ha houses the animals are housed. The zoo has been home to different animals over the years (some are listed in the map).

More recently, small lakes were constructed where birds such as swans and wild ducks stay and goldfish and carp have been raised.

In 2020, the project The transformation of the Tirana Zoo, reconceptualized the Zoo to suit different visitors and the animals that live there, as well as improving working conditions for the caretakers.

These are divided into several categories where the reorganization of spaces for animals and employees is foreseen, the installation of street lighting and the network of backup lines for internet telephony, sewage networks, treatment of green spaces and the filling with elements of urban furniture (benches, small baskets), as well as the creation of spaces for rest, entertainment and picnicking.

Farka Lake Park

Farka Lake Park is easily accessed by visitors, located only 9.6 km from the center of Tirana. This area is distinguished for its biodiversity and attractive hilly landscape. The park’s heritage includes ecosystems, special habitats, historical relics, and endemic and endangered species. As such, it is of great ecological, scientific, cultural, teaching and tourist importance.

Farka Lake, with 75 hectares of clean water surface, hosts several indigenous fish species, such as carp, ballgjer and catfish, making the lake one of the main assets of this recreational park. The absence of underwater grass allows various water sports such as sport fishing, rowing and swimming competitions. There is a 760-meter-long water-side promenade on the eastern side of the lake.
