The Plan

• Advise the coalition on financial and policy factors to aid mass e-bus adoption
• Evaluate efficacy of national policy proposals
• Support identification of participant cities
• Participate in regional & global summits

The Opportunity

• Create clean, high-value jobs and attract investment in electric mobility – the industry of the future
• Increase national energy security and reduce oil dependency
• Advance tangibly on climate and air quality goals
• Receive expert technical guidance and support on:
  - Cost-benefits of electric mobility adoption
  - Long-term national/state EV roadmap
  - E-mobility industry development
  - Sustainable transportation planning
• Position and market your government as a global pioneer in the electric bus field
• Network with local leaders and stakeholders on electric mobility, including transit agencies, NGO’s, utilities and other leaders of industry

Overview

TUMI is an international coalition assisting 20 global cities to create world-leading electric bus fleets in the next five years:

• The Transformative Urban Mobility Initiative (TUMI) is launching an international platform to accelerate adoption of electric buses in the Global South
• The TUMI E-Bus Mission will inspire and support 500+ cities to cumulatively electrify at least 100,000 transit buses

About us

Funded by the German Federal Ministry for Economic Cooperation and Development (BMZ), a core group of organizations such as C40 Cities, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), the International Council on Clean Transportation (ICCT), the Institute for Transportation and Development Policy (ITDP), ICLEI – Local Governments for Sustainability, the International Association of Public Transport (UITP) and the World Resources Institute (WRI) will work together to accelerate the transition to electric buses in the Global South.
